

Interzum Cologne, May 9 - 12, 2023

Creativity in profile: New family of decorative fittings from Schwinn

At Interzum 2023 in Cologne, Schwinn's stand in Hall 7.1 will feature a furniture handle, a furniture knob, a hook and a wardrobe combined in design. The manufacturer relies on a flat, oval-shaped profile for continuity, which in its simplicity gives rise to creative decorative fitting ideas.

„Rounded shapes“ is the keyword with which the new product family from Schwinn scores. For furniture knobs and handles, the oval shape ensures a pleasant grip. Thanks to the edgeless design, hooks and coat racks can be hung up quickly and harmoniously.

Within the product family, everything is reduced to the essentials. The minimalist profile celebrates the art of leaving things out, which is precisely why it is recommended for a consistent furniture design.
