EXPO SICAM, 2024

Ninka at the Sicam 2024: Attractive eye-catcher in Hall 2

In October 2024, Ninkaplast GmbH, Bad Salzuflen, once again presented itself as an outstanding partner for functional and integrated solutions inside kitchen cabinets. From waste management and the organisation of pull-outs and drawers to storage space solutions – plastic was the material of choice at Sicam in Pordenone, Italy, in terms of both shape and colour. The complete base unit „Qanto“, which Ninka had placed in the centre of a huge kitchen island, proved to be an attractive eye-catcher in Hall 2.

This presentation was both a surprise and an inspiration, and hardly any visitor could pass it by. As if from nowhere, a food processor appeared in the centre of a flush marble worktop measuring around three square metres. However, the user did not have to stretch out to use it; the tray and its load could be pulled into easy reach. After use, the appliance disappeared back into the attractive structure at the touch of a button.

Storage space staging with a wow effect

As a second possible application, Ninka showed a „spice Qanto“ equipped with three shelves within easy reach directly next to a hob in a kitchen unit. The lower shelf had space for tall bottles of oil and vinegar as well as spice mills, while the middle shelf, which was only half the size, held numerous small jars of spices. After cooking, everything is perfectly tidied away in the base unit. In this „Qanto“, the upper shelf fits into the worktop when retracted, providing a firm base for smaller kitchen utensils for preparatory cooking steps.

The “one2eight” waste collection system, which was positioned next to a water treatment system in the base cabinet, also proved to be an eyecatcher for visitors. However, it can also be used as a solitary solution installed in the centre.

Creative container combinations

Inspired by the British market, Ninka presented 25.5-litre waste bins at Sicam 2024, which can offer a total volume of 51 litres in combination with the “one2five” and “one2six” suspended frame systems in 40 cm base units. In 60 cm base units, a large bin of this type supplements the three-bin configuration with a 42- and an 8-litre bin and enables triple separation to a total of 75.5 litres. Ninka also offers a suspended waste bin solution for shallow installation depths of just 486 mm. To prepare the systems directly for installation, the manufacturer has developed a complete set with a push-to-open mechanism.

In addition, Ninka showed some clever combinations at Sicam. As all container systems are equipped with a static shelf-cover, above which there is usually storage space, the manufacturer suggested the use of suitable organiser trays, which are normally used in drawers.

Ninka was also creative when it came to the “one2top” range of bin lids and inserts: from organic waste lids with coconut mat odour filters and visually appealing metal inserts, which are particularly popular in Italy, to tidy organisation solutions with dustpans, hand brushes and cloth hangers – variety was the order of the day at the supplier trade fair for the furniture and interior design industry, which was once again very popular.

Caption 4: Ninka developed "one2eight" for the combination of waste collection and water treatment system (left). However, it can also be used as a solitary solution installed in the centre (right). Clearly visible: the trays that organise the storage space on the container cover. Photo: Ninka

Caption 5: Ninka presented the "Trigon", the storage solution for kitchen or end corners, in new, bright colours. The sturdy waste collection bag "Taska" was presented in a trendy green colour. Photo: Ninka

Caption 6: New from Ninka is "one2nine", a classic waste bin solution for use behind the hinged door. When the cabinet is opened, the cover plate lifts slightly, and the robust 17-litre container moves to the front of the cabinet. Photo: Ninka

Caption 7: Ninka is creative when it comes to the ‘Eins2top’ range of bins: this tidy organisational solution offers a dustpan, hand brush and cloth holder all in one. Photo: Ninka

Caption 8: Simple and elegant. Compact and easy to clean. That's '"Cuisio" from Ninka. In this drawer insert, translucent plastic shells in black, white or graphite meet aluminium connecting profiles in stainless steel look (top), gold (middle) or aluminium (bottom). The combination of different shells enables flexible size customisation. Photo: Ninka

Ninka

Ninkaplast GmbH, or Ninka for short, specializes in plastic moulding and surface finishing. Founded in 1928, the owner-managed family business develops and produces injection-molded parts for the kitchen furniture industry and for many other branches of industry, such as solar, lighting and medical technology, household appliances, coffee machines, office furniture, retail systems and banking, with just over 300 employees in Bad Salzuflen. As a kitchen furniture supplier, Ninka covers all areas from waste separation systems to pull-out and drawer organization and corner cabinet solutions. The company sells worldwide.
